FOR IMMEDIATE RELEASE
October 21, 2011 PR# 2011-09

FLOOD STAGE CHANGED ON BEAR RIVER

The Flood Stage on the Bear River at the river gauge located near the Idaho/Wyoming Border has been lowered from 10.20 to 8.60 feet.

Recent field work conducted in partnership with Bear Lake County Emergency Management indicated minor flood impacts started to occur along and near the river between the border of Idaho and Wyoming down-river to the Dingle area when water levels reach a stage of 8.60 feet.

Moderate flood impacts begin when the border river gauge reaches a stage of 10.50 feet and major flooding is possible when the stage reaches 11.70 feet. The new flood stage and flood categories along with updated flood impact statements can be viewed on the **River and Lakes** portion of our internet web page at:

<http://water.weather.gov/ahps2/index.php?wfo=pih>

by clicking on the square box called "**Bear Border**"
